# CHAPTER 1

### Title chapter 1

#### Introduction

Remember that wherever you want you can cite with  $\cite{a1}$  [1], [2] and/or [3] someone. Or use  $\footnote{That's a footnote}$  like this 1

#### **New section**

You can insert a definition

Definition 1.2.1. PoliMi: Politecnico di Milano

#### **Another section**

#### And a subsection

In this sub section I will include many images just to make the list of figures meaningful.

<sup>&</sup>lt;sup>1</sup>That's a footnote

#### Chapter 1. Title chapter 1

Figure 1.1: Caption of this PoliMi image.

#### **New section**

#### And also many sub

Or again more nested

- item 1
- item 2
- item 3

#### **New section**

This is an example of table. You can see it in Table 1.1.

Table 1.1: Table caption

Col 1	Col 2	Col2
Dim C.1	Dim C.3	Dim C.3
Data 1.1	Data 1.2	Data 1.3
Data 2.1	Data 2.2	Data 2.3
Data 3.1	Data 3.2	Data 3.3

#### You can do as many section as you want

The following equation has been created using \$\$:  $y_1 = a * x + b$ .

This is a more complex equation:

$$y_2 = a * x + b$$

2

, created using  $\setminus [ \ \ \setminus ]$ 

This is, (1.1), an enumerated equation:

#### 1.6. You can do as many section as you want

$$y_3 = a * x + b \tag{1.1}$$

, created using:
